

zomato

Strength:

- Market dominance in India
- Rapid growth- It registered a 125% growth year-on-year and number of orders (535.2 million) and monthly transacting customers (14.7 million) have also grown by 124% and 116%, respectively,

Weakness:

- In FY22, Zomato's net loss widened by 50% to Rs 12.23 billion, further continuing the negative trend in its fortunes.

Opportunity:

- The food delivery business is estimated to be worth \$110 billion by 2025.
- Venturing into new product lines like nutraceuticals presents a great opportunity for Zomato.

Threat:

- Zomato is also a victim of inflation and rising costs of energy.
- Zomato has seen its fair share of controversies that have undermined its public image.

Notifications for every mood: Zomato ensures that even its notifications are interesting and something the customer will look forward to. Its cheeky humor was even noticed by superstar Hritik Roshan, who shared the below-mentioned screenshot.

USP OF ZOMATO

- Zomato has been the leader of the online food delivery market since beginning and this is because of its unique marketing strategies and offers it provide to its customers.
- Zomato, has a wide range of food options, including a variety of cuisines and a large number of restaurants to choose from. They also have a very user-friendly interface, which makes it easy to use and navigate

MARKETING STRATEGY OF ZOMATO:

ZOMATO'S UNIQUE APPROACH TO TWITTER:

Effective communication is at the core of Zomato's excellent marketing strategy. Their tone of voice has always been engaging but rather unconventional and this is what makes them stand out. Their focus is interaction with their audience.

ONE EXAMPLE:

Guys, kabhi kabhi ghar ka khana bhi kha lena chahiye

Zomato's marketing strategy during Covid-19:

For daily wage earners: The food delivery giant set up a fund - Feed the Daily Wager- to provide relief to the families of daily wage earners who are stuck indoors during these times and are unable to generate any income. Thses campaign made people connect with people personally

PLATFORM	MAU	Revenue	USP
	20 million	\$900 million.	Swiggy don't have minimum order criteria, and also have less delivery time than others
	60 Million	Rs. 67.7 crore	Possessing its delivery layer wholly is Dunzo's USP. While many platforms follow the order-only model, Dunzo hires delivery drivers and takes full responsibility for its deliveries.

PERSONAL VIEW ON INDUSTRY

1. Online food delivery platforms have changed how we order food. They make it super easy to look at menus, order what we want, and get our food delivered to our door quickly.
2. But still the industry have not been able to make profit continuously. Most of the platforms even the market leader have not been able to generate positive revenues and the main reason behind this are:
 - To attract and retain customers, many platforms offer frequent discounts and promotional deals
 - The final step of delivering food to the customer's doorstep, known as the "last mile," can be expensive due to fuel costs, labor expenses, and traffic-related delays.
 - These platforms have spent heavily on marketing on the platform which is also one of the reasons for their loss-making business.

To make these platforms profitable some measures are:

1. Implement strategies to encourage customers to add extra items to their orders or try higher-margin items. This can increase the average order value and boost profits.
2. Work with restaurant partners to optimize menu items for profitability. Highlight dishes with higher margins and encourage their promotion.

USER PERSONA

Emily is a 28-year-old marketing professional based in a bustling urban city. She has a keen interest in exploring diverse cuisines, experimenting with new recipes, and connecting with fellow food enthusiasts.

Pain Point:

Despite her enthusiasm for exploring new recipes and connecting with fellow food enthusiasts, while there are various social media platforms and cooking websites, they lack the focused and cohesive community experience she desires.

Subham is a 35-year-old office manager who leads a busy lifestyle in the city. She's health-conscious and strives to maintain a balanced diet to support her overall well-being.

Pain Points:

Despite her determination to make calorie-conscious choices, Subham often finds it challenging to estimate the caloric content of dishes accurately, especially when dining out. This uncertainty sometimes restricts her dining options excessively.

Sarah is a 32-year-old marketing manager with a demanding work schedule and a busy family life. She often finds herself juggling work meetings, household responsibilities, and spending time with her two young children.

Pain Points:

Sarah often struggles with last-minute meal planning. The unpredictability of her daily schedule made it challenging to ensure timely and healthy meals for her family.

CALORIE COUNT FEATURE ON ZOMATO

Partner with restaurants or food delivery services to collect accurate nutritional information for each dish, including calorie counts. Create a database to store this nutritional data securely.

Incorporate the calorie count information into the existing dish listings on the Zomato app. Display the calorie count prominently alongside the dish name and other relevant details.

Enable users to filter dishes based on calorie ranges (e.g., low calorie, moderate calorie, high calorie). Provide advanced search options, such as filtering by cuisine, dietary preferences, and calorie content.

Regularly collect user feedback and analyze usage patterns to improve the feature's functionality and user experience. Stay updated with nutritional guidelines and research to refine the accuracy of calorie calculations.

Backend Implementation:

Nutritional Data APIs: RESTful APIs that enable seamless retrieval of nutritional data for dishes from the database.

Data Update Mechanism: Create a data update pipeline that allows restaurants to periodically update their dish information, including ingredients, portion sizes, and any recipe changes.

Calorie Calculation Algorithms that analyze ingredients and portion sizes to calculate accurate calorie counts. Incorporate industry-standard nutrition databases to ensure accuracy in nutrient information

New calorie count feature, seamlessly integrated into the menu display on the screen

Here we can see ingredients used in the particular dish is mentioned with their quantity and at last the calorie count is also mentioned

BUSINESS VALUE:

- The availability of accurate nutritional information allows you to target specific user segments, such as those looking for low-calorie options, gluten-free meals, or high-protein dishes.
- Collaborating with restaurants and food delivery services to gather nutritional data can open up new partnership opportunities. Establishing a data-sharing relationship can lead to exclusive offers, promotions, and partnerships that benefit both parties.
- nutritional data could potentially be used for market research and trend analysis. This data can be valuable to health researchers, nutritional experts, and even food manufacturers, creating potential avenues for monetization.

ZOMATO FOODIE CONNECT: SOCIAL PLATFORM

Introduce a feature called "Zomato FoodieConnect," a dedicated social platform that connects food enthusiasts, home cooks, and culinary adventurers from around the world. FoodieConnect is designed to create a vibrant community where people can share recipes, culinary experiences, and their passion for all things food-related.

User Profiles and Networking:

Upon signing up for Zomato Foodie Connect, users will have the opportunity to create personalized profiles that highlight their culinary preferences, cooking styles, and favorite dishes.

Recipe Sharing: FoodieConnect serves as a hub for sharing and discovering recipes. Users can post their own recipes, complete with ingredients, step-by-step instructions, photos, and cooking tips.

Culinary Journeys and Experiences:

Foodies can share their culinary journeys, from memorable restaurant experiences to international food adventures. Users can write about their favorite dining spots, hidden gems, and must-try dishes.

In this app section, you'll discover a collection of recipes contributed by people from all around. As soon as you enter, you'll see a variety of dishes right on the main screen. If you're looking for something specific, there's a search bar at the top.

This icon take you to a place where you can connect with others, share things, and have conversations.

Here we can post pictures of our meals and explaining how you made them. We can talk about the ingredients we used, the flavors we combined, and the stories behind our recipes. It's a way to connect with others who love food as much as we do.

BUSINESS VALUE:

- It fosters a strong sense of community among users who share a common interest – food. This sense of belonging encourages users to keep coming back to connect with others who share their passion.
- The interactions on FoodieConnect provide valuable data insights into user preferences, trending cuisines, and popular dishes. This information can inform Zomato's offerings and marketing strategies.
- As the platform grows, there may be opportunities to introduce premium features, collaborations with brands, or sponsored content within FoodieConnect, generating additional revenue streams
- FoodieConnect sets Zomato apart from other food-related platforms by providing a dedicated space solely for food enthusiasts

ZOMATO FUTURE FEAST

**Order Scheduling Options:**

Users will be able to select a specific date and time for delivery. Provide options for both immediate orders and future orders, with the ability to schedule days

Customization: Users will be able to customize their orders just like with immediate orders. Provide options for special instructions, allergies, and preferences.

Notification: Users will receive notification before the scheduled time asking if the users want to cancel the scheduled order

VALUE TO BUSINESS:

- By offering immediate and future order scheduling, you cater to different types of customers. Some customers may want their orders right away, while others might prefer to plan ahead.
- Allowing customers to choose their preferred delivery date and time, whether it's for immediate delivery or a future date, enhances their convenience. This convenience can lead to increased customer satisfaction and loyalty.
- Offering future order scheduling can help reduce the number of last-minute rush orders, which can strain resources and lead to errors.
